Delivering Supply Chain Excellence

When it comes to the yard management processes associated with the different supply chain companies today, there is a significant lack of visibility due to manual processes. While many companies have placed their best bet to solve the existing visibility predicaments inside warehouses, their overlook on the outside elements—such as traffic jams, weather situations, and other factors affecting global supply chains. Based on SAP HANA technology, leogistics' digital supply chain solution optimizes and automates the complex supply chain execution processes, and ultimately increases visibility into existing yard management

> " Our main focus is to digitize our clients' internal and external supply chain systems by delivering an SAP-based solution

process. "Our main focus is to digitize our clients' internal and external supply chain systems by delivering an SAP-based solution," Andre Kaeber, the managing director of leogistics GmbH. The company's solution contains many preconfigured processes for plant and location logistics as well as rail, OEMs and port logistics, and stakeholders are efficiently integrated into their IT system environment.

Built on the principle that IT should follow the business process rather than the other way round, leogistics has developed a flexible business-process oriented solution. This allows the company to configure the processes in such a way that the clients can utilize it seamlessly. In order to meet the needs of different industries, the solution delivers a different set of master data, information level, and prophecies that can assist clients in handling and automating different elements across their yard. Delivered with an innovative user interface and based on SAP U15 latest web technology, the solution can be customized according to the needs of the customers. "Customers always need tailored solutions which are simple and easy to implement, and that's what we provide," states Kaeber. In addition, the solution can collect external data from IoT devices and sensors to cater even a higher level of visibility. It can also integrate with various hardware systems which simplifies and automates the yard management process even further. Kaeber mentions, "The solution enables the mapping of processes starting with the registration of incoming modes of transport and persons, the control of site-specific locations, such as parking areas or loading points, to the coordination of means of transport."

What really differentiates leogistics from the other vendors in their flexibility deliver a holistic solution for varied industries. For instance, the company has implemented five different solutions—appointment scheduling, MES integration for loading and quantity calculation, rail course management, TMS, and security installations—in five different areas of a chemical manufacturer. Such examples stand testament for the unique niche that leogistics have carved for themselves in the logistics landscape. The company's

partnership has also helped them is their way towards success. As a certified SAP Service Partner, SAP Special Expertise Partner for SCM, and SAP Value Added Reseller, leogistics can provide its customers with comprehensive support throughout the supply chain. Their clientele includes reputable companies from the high-tech, consumer products/food, automotive, pharmaceuticals, and logistics service provider sectors. "Together with our parent company Corporate Business Solutions, we provide international SAP customers with the extensive service portfolio of an SAP solution provider and specific expertise for designing global process and SAP system processes," informs Kaeber.

Going ahead, leogistics will be focusing on enhancing its operations on a global scale. To this end, they have already opened a new office in the U.S. and assembled a competent team of consultants and operators. Strategically, the company will be developing its solution to be cloud ready such that the customers can be provided with an option to work remotely in a simplified and faster manner. **CR**
